

Walk a Mile

**When you walk a mile in someone's shoe,
then you understand what they go through.**

**We should help them raise the funds,
for finding a cure for Parkinson's.**

**It can cause people to shake & tremor,
and there's many things to remember.**

**A person's leg can freeze so tight,
that it's hard to sleep at night.**

**We need the best medicine known,
so they won't fall & break a bone.**

**Parkinson's can affect the way people talk,
and it's so hard for them to walk.**

**There is different kinds of this disease,
and we need to make it cease.**

**It affects people in a different way,
and we should keep it at bay.**

**There's so much we need to learn,
long before they take their worst turn.**

**Sometimes it is hard to know,
but you can tell when they walk slow.**
